TURKI HUFAIS

Junior Penetration Tester | Security Researcher
Jeddah, Saudi Arabia | +966 50 431 0123 | turkihufais@gmail.com
linkedin.com/in/turki-hufais | github.com/TurkiTheCreator | Hack The Box: 0xgyro

PROFESSIONAL SUMMARY

eJPT-certified Computer Science student specializing in Cybersecurity & Networks, credited with a published CVE for an authenticated blind SQL injection in ProcessMaker and ranked in the Top 25 on Hack The Box in Saudi Arabia. Hands-on with web application testing, network enumeration and exploitation, backed by enterprise IT operations experience at United Sugar Company (Savola Group). Seeking a Junior Penetration Tester or Security Researcher role.

VULNERABILITY RESEARCH & ACHIEVEMENTS

- **CVE-2026-107803 (GHSA-xf7p-gp7c-w7gh):** Credited reporter of an authenticated blind SQL injection vulnerability in ProcessMaker; coordinated disclosure, published October 2026.
- **Hack The Box:** Top 25 ranked player in Saudi Arabia (0xgyro).
- **HackerOne:** Active bug bounty hunter (txu7t); web application testing on public programs using Burp Suite.

EXPERIENCE

IT Administrator Intern 04/2026 – 08/2026
United Sugar Company (Savola Group), Jeddah, Saudi Arabia

- Contributed to a company-wide endpoint security initiative to improve Microsoft Secure Score and DEX compliance, analyzing device health with Nexthink.
- Supervised and monitored network infrastructure using Cisco Meraki.
- Deployed workstations for a ~35-office renovation using SCCM, PXE boot and Active Directory; provisioned 12 laptops for incoming interns.
- Developed a PowerShell script (Deploy.ps1) automating pre-domain-join laptop provisioning.
- Built an Excel/VBA barcode-based stock management application for IT inventory.
- Delivered end-user support, hardware/software troubleshooting and ticket management; mentored a junior intern.

PROJECTS

Tusk: Python Security Scanner | *Python* In Development

- Developing a Python-based security scanner to automate vulnerability detection.
- github.com/TurkiTheCreator/Tusk

SOC Automation Lab | *Wazuh, Sysmon, Shuffle, TheHive, VirusTotal, Vultr*

- Deployed a cloud SIEM/SOAR pipeline on Vultr (Ubuntu 24.04) ingesting Sysmon telemetry from a Windows 11 endpoint.
- Wrote a custom Wazuh rule detecting Mimikatz execution (Sysmon Event ID 1), mapped to MITRE ATT&CK T1003, with alert enrichment and case creation automated through Shuffle, VirusTotal and TheHive.
- Resolved an Elasticsearch 8.x TLS/authentication misconfiguration blocking TheHive deployment.
- github.com/TurkiTheCreator/SOC-Automation-Lab

HarmBench LLM Robustness Evaluation | *Python, Hugging Face, ELK Stack*

- Evaluated the robustness of open-source LLMs against adversarial prompts using the HarmBench framework in a university team project.
- Centralized and visualized evaluation results with the ELK Stack.
- github.com/TurkiTheCreator/harmbench-llm-evaluation

EDUCATION

Bachelor of Computer Science, Submajor in Cybersecurity & Networks 2024 – 2027 (Expected)
ECE Paris, Paris, France

CERTIFICATIONS

eJPT: eLearnSecurity Junior Penetration Tester (INE Security) May 2026

TECHNICAL SKILLS

Offensive Security: Web Application Penetration Testing, SQL Injection, OWASP Top 10, Network Enumeration, Vulnerability Assessment, Coordinated Disclosure
Tools: Burp Suite, Nmap, Gobuster, Kali Linux, Parrot OS
Detection & Monitoring: Wazuh, Sysmon, TheHive, Shuffle, ELK Stack, MITRE ATT&CK
Systems & Networking: Active Directory, SCCM, PXE, Cisco Meraki, Windows, Linux
Programming: Python, PowerShell, SQL, VBA, TypeScript, JavaScript, Node.js, React, Next.js

LANGUAGES

Arabic (Native) | English (Fluent) | French (Professional Proficiency)
